Rev 1.0
MADE IN THE USA

Kit:

- ① Guard
- ② Surface prep pad

Tools necessary:

- ① t-25 Torx driver

- ① Use a small tool to push the centers out of the (2) OEM toggle fasteners. Make sure you recover the centers and keep them in a tray with the toggle heads.

- ② Use a t25 torx driver to remove the OEM fastener on the right side of the belly pan, then remove the fastener on the left side. Remove the pan and set it aside.

- ③ Before you peel the backing off of the high temp adhesive do a test-fit to get a feel for how you will be applying this part. Once you have a feel for where the bumpers on the left and right of the part will rest, and how far back the top and bottom flanges will go, use the alcohol prep pad to clean the top and bottom surfaces of the oil cooler.

- ④ Peel the backer off of the adhesive strips, carefully place the guard over the oil cooler like you did in step 3. Press firmly on the top and bottom flanges to ensure good contact of the adhesive. Put the belly pan back on.

CONGRATULATIONS!

You've completed your installation. If at any point you have questions about your installation or have any feed back for us, we'd love to hear it. A downloadable version of these instructions can be found at our web site. www.AltRider.com

After 5 hours or 100 miles of riding, check your newly installed equipment to ensure all hardware is secure.
